### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 141-146, 148, 150-168, 170-175, 179 and 181-208 are pending in the instant application.

The amendments and remarks filed on January 23, 2008 have been received and entered.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 195, 203 and 204 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 195, 203 and 204 contain the trademark/trade name Lipofundin or Intralipid. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe a therapeutic agent, which a lipid being used for promoting healing and regeneration of damage eye epithelium or cornea of the anterior segment of the eye and, accordingly, the identification/description is indefinite.

Art Unit: 1612

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 141-146, 148, 150-168, 170-175, 179 and 181-208 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims are drawn to the phrase “a reconstituted high density lipoprotein” which was discussed in the previous office action. The claims are also drawn to a combination of “non-cholesterol lipid components capable of reconstituting a high density lipoprotein comprising one or more of a sphingolipid and a phospholipid and one or more of a glyceride and a triglyceride”. The specification describes the phrase as in written in the claims, without describing a representative number of non-cholesterol lipid components. A chemical genus can be adequately described if the disclosure presents a sufficient number of representative species that encompass the genus. If the genus has substantial variance, the disclosure must describe a number of species to reflect the variation within the genus. See MPEP 2163. To provide adequate written description and evidence of possession of a claimed genus, the specification must provide sufficient distinguishing identifying characteristics of the genus. The factors to be considered include disclosure of complete or partial structure, physical and/or

chemical properties, functional characteristics, structure/function correlation or any combination thereof.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant in his arguments refers to a U.S. Patent and a U.S. Patent application, which use the term reconstituted HDL or rHDL in their claims. Applicant is reminded that the use of such phrases in the claims is permitted, considering that the specification provides an adequate written description for such claims. Applicant in his remarks refers to the attached references which describe rHDL. However, such references are not of the record.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ZOHREH A. FAY whose telephone number is (571)272-0573. The examiner can normally be reached on Monday to Friday 9:30-6:00.
